AlpArray temporary station naming

New with respect to the Technical Strategy document:

- FDSN Network code is **Z3**
- Station codes are **5** alphanumeric characters
    - first character reserved as **A**
    - last character **A** per default, changed to **B**, **C**, etc. in case of **major** (>10m) site changes (e.g. A001A → A001B)
    - middle **3** characters are digits per country as proposed below
- Location code: **00**, after **minor** site changes: **01**, **02**, etc. and metadata epoch updated
- Stations will be registered at ISC (<u>by local network</u>)

- The middle three characters refer to the country of deployment using the following range of numbers (see next page):

Temporary stations' naming proposal

Country in which station is deployed	Current plan of temporary stations	Number allowing flexibility for future changes	Proposed range of station names
AT	37	50	A001A – A049A
BH	3	10	050 – 059
CH	3	10	060 – 069
CZ	20	30	070 – 099
DE	~~35~~ ≥54	~~50~~ 100	100 – 149 and 350 – 399
FR	~~~80~~ 63	100	150 – 249
HR	3	10	250 – 259
HU	14	20	260 – 279
IT	32	50	280 – 329
SK	9	20	330 – 349
OBS	~~~32-45~~ 33	50	~~350 – 399~~ 400 – 449
